

COLORADO RV SERVICE

Wheel & Brake Safety Packages

“Because what rolls and stops your RV matters most.”

● BASIC – Wheel Service & Inspection

Starting at \$379 per axle

- ✓ Remove hubs & inspect components
- ✓ Clean & repack bearings with high-temp grease
- ✓ Install new double-lip grease seals
- ✓ Inspect brake shoes, magnets, and wiring
- ✓ Check spindle condition & torque lug nuts
- ✓ Set bearing preload correctly

👉 **Best for:** Well-maintained units with no known issues

⚠️ *If damage is found, upgrade is recommended*

● STANDARD – Bearing Rebuild + Brake Service (MOST POPULAR)

\$549 – \$749 per axle

- ✓ Everything in Basic PLUS:
- ✓ Replace inner & outer bearings (premium quality)
- ✓ Install new races (properly seated) **OR** Install complete hubs assembly
- ✓ Inspect & clean brake assemblies
- ✓ Adjust brakes for proper engagement
- ✓ Verify magnet function & wiring condition

👉 **Best for:** Units showing wear, noise, or unknown service history

💡 *This is where most customers land for safety + value*

PREMIUM – Complete Wheel & Brake System Refresh

\$749 – \$999 per axle

- ✓ Everything in Standard PLUS:
- ✓ Install NEW complete brake assemblies (shoes, springs, magnet)
- ✓ Replace contaminated or worn components entirely
- ✓ Full system cleaning (remove grease/dust contamination)
- ✓ Precision brake adjustment & performance check
- ✓ Final road-ready safety verification

👉 **Best for:** Maximum safety, long trips, or compromised systems
🔥 *Eliminates most common roadside failures*

Why This Matters

- Bearing failure = wheel loss
- Brake failure = no stopping power
- Most issues are **invisible until it's too late**

👉 Annual inspection and service is the difference between:
a smooth trip... or a catastrophic roadside breakdown

Optional Add-Ons

-  Hub Replacement (if damaged)
-  Spindle Inspection & Repair
-  Brake Wiring Repair
-  Suspension Check
